Profile Summary

I am a 20-year-old Python developer with strong hands-on experience in building robust backend systems using Django and Django REST Framework. My projects have included user authentication with JWT, API key generation, pagination, and integration with external APIs like Zoho. I have a growing interest in AI and automation, and I'm actively expanding my skills in AI integration and Python scripting to build smarter, scalable solutions.

Technical Skills

- Programming Languages: Python
- Web Frameworks: Django, Django REST Framework
- API: RESTful API Design, JWT Authentication, API Key Systems
- Tools & Platforms: MySQL, AWS, Git, PostgreSQL
- Other: AI Integration (Exploring), Automation Scripting, Docker (basic), HTML/CSS (advanced),

Project Experience

- Portfolio Server (2025): Developed a backend system where users can register and generate API keys to securely access their portfolio data.
- Student Information Management System (2025): Built using Django REST Framework and MySQL for storing student data, including authentication with JWT, and a separate Django-based frontend dashboard for viewing data.
- Course App with Payment Integration (2025): Created a Django app that manages courses, pricing, and user enrollment with proper access control.
- Email Integration with Zoho API (2025): Successfully integrated Zoho Email API for automated communication in a DRF-powered application.

Education

B.Sc. Computer Science (In View)

University of Ibadan (Distance Learning Centre), Nigeria
